

To Whom It May Concern,

Mid-West Forge in Cleveland has been utilizing Expert Crane services for all of our crane needs the past 3 years. MWF utilizes Expert Crane for everything from routine maintenance to emergency calls and new equipment fabrication and installation. ECI without fail answers the call and gets MWF cranes back up and running as soon as possible. When we need material handling or manufacturing improvement advice, Lance is always there to help us without question. I would recommend ECI and Lance to any company looking to keep their systems up and running efficiently.
